

# LOW LEVEL DOCUMENT FOR AMAZON SALES ANALYSIS

## DATA ARCHITECT

Region ,country, item type ,Sales channel , order priority , order date ,order id , ship date ,unit sold , unit price , unite cost , total revenue , total profit

These all columns are available in a single table

Using this order data column we extract month and year for calculating sales trends

## TOOLS USED

For analysis of sales data we use Power bi ,excel for data cleaning .

In power bi we use many functions in dax (data analysis expression ) like sum , average , min ,max ,calculate ,and many more its helps to understand the data
